gamme standart

Les outils STANDARD LINE sont spécialement conçus pour traiter tous types de marbre, matériaux composites et fibre de verre.

gamme Black

BLACK LINE et la ligne d'outils pécifiques au travail des marbres durs et abrasifs, comparable aux outils soudobrasés, peuvent être utilisés avec succès aussi sur la pierre volcanique, le calcaire et les agglomérats synthétiques.

gamme Pink

PINK LINE est la ligne d'outils spécifique pour travailler les granits à faible teneur en quartz, les grès et les matériaux céramiques. Elle ne remplace pas le matériau fritté mais constitue un complément et une alternative valable là où il n'est pas possible d'utiliser ou de produire du matériau fritté.

gamme 88/12

88\12 est une méthode née d'un besoin, celui d'augmenter la concentration de diamant sur la même surface pour prolonger la durée de vie de l'outil, en particulier lorsqu'il est utilisé sur des marbres, granits, grès et matériaux céramiques durs et abrasifs. L'acronyme 88\12 s'inspire du bronze, nos ancêtres avaient compris qu'en ajoutant 12% d'étain au cuivre, on obtenait un alliage fantastique, plus dur et plus résistant à la corrosion .

Sans rien inventer, en copiant une méthode ancienne, nous avons donc ajouté 12% de diamant à grain fin en plus parmi les plus gros grains de diamant.
